Security tips for Host-to-Host solution customers

1. Please keep your USB Key properly and contact your relationship manager in case you lost it;
2. Host-to-Host Solution provides procedure-free services. If procedure settings are required, customers should develop the procedure in their self-owned system and use them properly;
3. Customer could set up an IP whitelist in the security client software, indicating which machines in their Intranet are allowed to use the service, to improve your transaction security;
4. If you encountered hacking or other cybersecurity issue, please contact your relationship manager. We will suspend the service for you;
5. If you have any question, feel free to consult your relationship manager;
