FWD Life Insurance Company (Bermuda) Limited
(Incorporated in Bermuda with limited liability)

Imagine your life in the not-so-distant future. Your kid is studying abroad at a prestigious university, you and your wife have just moved into an even bigger home, and the savings for that post-retirement round-the-world trip you two have always dreamed of are growing steadily.

Chances are, you're at a life stage where you need to start planning for this medium-term scenario or something similar. And it is one that will require substantial financial resources soon enough.

Your solution may be a targeted savings plan that offers the wealth growth potential to enable you to plan for future. Even if you're not working towards any particular goal at the moment, it's always a good idea to accumulate wealth steadily for yourself and your loved ones.

Limited offer¹

That's why we're bringing you Easy WealthPlus Endowment Plan (the "Plan"), designed to support your medium-term goals by offering 8 years benefit term. With a single premium payment, you can enjoy a guaranteed maturity return of up to 4.0% per annum as well as life protection, the Plan will give you the confidence to set goals and look to the not-so-distant future.

After all, it's always good to know you have the control to achieve your goals, when you want to.

Convenience of one-time payment for simple planning

You only need to pay premium at one go, the Plan offers 8 years' benefit term to meet your different medium-term saving needs. When the policy matures in 8 years' time, and at that time if the policy is in force and the insured is alive, you may receive 100% of notional amount² as maturity benefit with a guaranteed maturity return³ as follow:

Policy currency	Benefit term	Guaranteed returns
US\$	8 years	4.0% p.a. Up to 136.8% of the single premium

Life Protection for peace of mind

The Plan provides life coverage. A lump sum death benefit will be payable to the beneficiary if the insured passes away. The death benefit is equivalent to the higher of 105% of single premium paid or guaranteed cash value as at the date of insured's death, and less any indebtedness (if any).

Unlimited times for change of insured

After the end of the 1st policy year and the insured is alive, you may exercise the change of insured option⁴ for unlimited times until the policy matures. After the change of insured, the benefit term remains unchanged.

Contingent insured and contingent policy owner for continuous policy extension

You may nominate a contingent insured⁵ while the policy is in force and the insured is alive. In the event of the death of the insured after the end of the 1st policy year, the nominated contingent insured will automatically become the new insured, eliminating the possibility of policy termination resulting from the unexpected death of the original insured. In addition, you can nominate a contingent policy owner⁶ while the policy is in force so that the policy can be managed by the contingent policy owner in the event of the death of the original policy owner.

Easy application without medical examination

Application for the Plan is simple and no medical examination is required.

Key product risks

Credit risk

This product is an insurance policy issued by FWD. The application of this insurance product and all benefits payable under your policy are subject to the credit risk of FWD. You will bear the default risk in the event that FWD is unable to satisfy its financial obligations under this insurance contract.

Liquidity risk

This product is a 8 years term insurance policy starting from the commencement date to the maturity date. The policy contains cash value and, if you surrender your policy in the early policy years or before its maturity date, the amount you get back may be considerably less than the total premiums you have paid. You should ensure that you intend to keep your policy for the entire benefit term. Application of the Plan may constitute the liquidity risk to your financial condition. You need to bear the liquidity risk associated with the Plan.

Exchange rate and currency risk

The application of this insurance product with the policy currency denominated in a foreign currency is subject to that foreign currency's exchange rate and currency risk. The foreign currency may be subject to the relevant regulatory bodies' control (for example, exchange restrictions). If your home currency is different from the policy currency, please note that any exchange rate fluctuation between your home currency and the policy currency of this insurance product will have a direct impact on the amount of premium required and the value of benefit(s) to be received. For instance, if the policy currency of the insurance product depreciates substantially against your home currency, there is a negative impact on the benefits you receive from the product. If the policy currency of the insurance product appreciates substantially against your home currency, your burden of the premium payment is increased.

Inflation risk

The cost of living in the future may be higher than now due to the effects of inflation. Therefore, the benefits under this policy may not be sufficient for the increasing protection needs in the future even if FWD fulfills all of its contractual obligations.

Early surrender risk

If you surrender your policy before its maturity date, the amount of the benefit you will get back may be considerably less than the total amount of the premiums that you have paid.
